**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 09/29/2005 has been entered.

### ***Response to Arguments***

2. Applicant's arguments filed 09/06/05 have been fully considered but they are not persuasive. The amendment to the claims has overcome the rejection in view of Nasser, US 6,109,210. The remarks and amendment however do not overcome the rejection of Wang, US Patent 6,073,581 (reference discussion below).

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 13, 16-18 and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Wang, US Patent 6,073,581.

Art Unit: 3644

Wang discloses a ball (3) with an outside and an inside, the inside including space for containing animal treats and a separate compartment wherein the separate compartment also includes at least one space for containing animal treats and two openings in the separate compartment and at least one opening from the outside to the inside of the ball (reference detailed Figure 4 below).

**FIG. 4**

Regarding claim 16, Wang discloses the separate compartment is offset from a center location of the ball (reference Figure above showing the separate compartment offset to the left of center).

Regarding claim 17, Wang discloses the two openings in the separate compartment include a funnel section for funneling items into the at least one opening

Art Unit: 3644

(reference the above figure showing the opening narrowing into the separate compartment thereby defining a funnel).

Regarding claim 18, Wang discloses a removable cap (20) for the at least one opening in the ball.

Regarding claim 21, Wang discloses the cap is domed shaped (reference Figure 2).

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over Wang, US 6,073,581 in view of McEvoy, IE 82913 B3.

Wang discloses the invention substantially as claimed. However, Wang does not disclose the use of a sinuous edge on the ball. McEvoy teaches within the analogous art of balls, the use of a sinuous raised edge to augment the normal path of a ball. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use the sinuous raised edge as taught by McEvoy with the apparatus of Wang so as to augment the natural path of a ball to make a more enticing toy.

Art Unit: 3644

*Allowable Subject Matter*

7. Claims 19 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

*Conclusion*

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Staley (US 7,146,934), Simon (US 6,186,095), Hoeting et al. (US 5,476,408), Matz et al. (US 4,826,043), Hirshfeld (US 4,515,373), Burton (US 4,228,920), Farmer (US 4,194,737), Brittingham (US 3,954,269), Smith (US 3,679,212).
